

## The Beauty and Joy of Computing

### Lecture #24 Future of Computing and YOUR Future

**UC Berkeley EECS  
Lecturer  
Gerald Friedland**

**Sony makes experimental e-paper watch**

**Message: Tech industry goes fashion!**

<http://www.bbc.com/news/technology-30245296>

## Administrivia: Become active!

- **With-Snap! Exam details**
  - No exam handed out unless you've filled in both HKN + our survey
  - No "study sheets" needed / allowed since you have access to Snap!
- **Final Exam details**
  - Only bring pen(cil)s, three 8.5"x11" handwritten sheets (writing on both sides).
  - Leave backpacks, books, calculators, cells & pagers home!
  - Everyone must take ALL of the final!
  - Bring your "Beauty and Joy of Computing" Art/Poem for extra credit!
- **If you did well in CS10 and want to be on staff?**
  - Usual path: **Lab Assistant** ☒ **Reader** ☒ **TA**
  - Indicate on your final survey whether you're even remotely interested
  - We strongly encourage anyone who gets an B or above in the class to follow this path...

## Opportunities Next Semester

- **CS61A (1<sup>st</sup> course in CS major)**
  - Structure and Interpretation of Computer Programs, Python
- **CS9 series (learn a second language)**
  - I would recommend Python next, CS9H
- **GamesCrafters DeCal (Game Theory R & D)**
  - Develop SW, analysis on 2-person games of no chance. (e.g., go, chess, connect-4, nim, etc.)
  - Req: Game Theory / SW Interest
- **MS-DOS X DeCal (Mac Student Developers)**
  - Learn to program Macintoshes.
  - Req: Interest. Owning a mac helps, not required.
- **UCBUGG DeCal (Recreational Graphics)**
  - Develop computer-generated images, animations.
  - Req: 3D interest

## Ok, I'm hooked! Where do I go next?

- **CS Major / Minor**
  - You are here →
- **CS61A**
  - In Python, one big idea every week. Awesome!
- **CS61B**
  - In Java, data structures, algorithms and software engineering (lite)
- **CS61C**
  - In C and MIPS, Great ideas in computer architecture (parallelism) ... I teach this!

Midland  
CC BY-NC-SA

## Things to remember from CS10

- **Abstraction**
  - The key idea underpinning all computer science
  - ...and (in CS10) functions, HOFs
- **...From Blown to Bits**
  - Technology has social implications (privacy, energy, copyright, etc); try to see the big picture
  - It also often has unintended consequences!
  - Things are never black or white, pure good or pure evil
- **...From "Program or Be Programmed"**
  - Technology has an explicit and implicit agenda, understanding it is important.
  - Learning to program is empowering (Steve Jobs' video)

Midland  
CC BY-NC-SA

## Exciting Future Implications

- **In computing, chronic unsolved problem**
  - Easy parallel programming
- **Implications for apps:**
  - HUGE Computing power available in cell phone, car
    - On-body health monitoring
    - Google + library of congress
- **As devices shrink...**
  - The need for great HCI (human-computer interfaces) critical as ever! (voice, gesture)

- Natural language processing?
- Interact by motion!
- 3D displays?
- Personal Robotics?
- Self-driving cars?
- 3D Printing?
- Optical/quantum computing?
- Personal air vehicle?
- Space travel?
- Computer displays in glasses?
- Flexible displays?
- Smart drones?
- Energy!

Midland  
CC BY-NC-SA

## Computer Technology - Growth!

<ul style="list-style-type: none"> <li>Processor           <ul style="list-style-type: none"> <li>Speed 2x / 2 years (since '71)</li> <li>100X performance last decade</li> <li>When you graduate: 3 GHz, 32 Cores</li> </ul> </li> <li>Memory (DRAM)           <ul style="list-style-type: none"> <li>Capacity: 2x / 2 years (since '96)</li> <li>64x size last decade.</li> <li>When you graduate: 128 GiB</li> </ul> </li> <li>Disk           <ul style="list-style-type: none"> <li>Capacity: 2x / 1 year (since '97)</li> <li>250X size last decade.</li> <li>When you graduate: 16 TeraBytes</li> </ul> </li> </ul>	<p>Kilo (<math>10^3</math>) &amp; Kibi (<math>2^{10}</math>) ↓ Mega (<math>10^6</math>) &amp; Mebi (<math>2^{20}</math>) ↓ Giga (<math>10^9</math>) &amp; Gibi (<math>2^{30}</math>) ↓ Tera (<math>10^{12}</math>) &amp; Tebi (<math>2^{40}</math>) ↓ Peta (<math>10^{15}</math>) &amp; Pebi (<math>2^{50}</math>) ↓ Exa (<math>10^{18}</math>) &amp; Exbi (<math>2^{60}</math>) ↓ Zetta (<math>10^{21}</math>) &amp; Zebi (<math>2^{70}</math>) ↓ Yotta (<math>10^{24}</math>) &amp; Yobi (<math>2^{80}</math>)</p>
---	--

UC Berkeley "The Beauty and Joy of Computing": Future of Computing (7)

## Peer Instruction

What was recently proposed to go after Yotta?  
(i.e.,  $10^{27}$ )

a) Lotta  
b) Lotsa  
c) Wholelotta  
d) Hella  
e) Zillion

Both Google's and WolframAlpha's calculator can understand and use "Hella" in their calculations!

UC Berkeley "The Beauty and Joy of Computing": Future of Computing (8)

## Kilo, Mega, Giga, Tera, Peta, Exa, Zetta, Yotta

- Kid meets giant Texas people exercising zen-like yoga. – Rolf O
- Kind men give ten percent extra, zestfully, youthfully. – Hava E
- Kissing Mentors Gives Testy Persistent Extremists Zealous Youthfulness. – Gary M
- Kindness means giving, teaching, permeating excess zeal yourself. – Hava E
- Killing messengers gives terrible people exactly zero, yo
- Kindergarten means giving teachers perfect examples (of) zeal (&) youth
- Kissing mediocre girls/guys teaches people (to) expect zero (from) you
- Kinky Mean Girls Teach Penis-Extending Zen Yoga
- Kissing Mel Gibson, Teddy Pendergrass exclaimed: "Zesty, yo!" – Dan G
- Kissing me gives ten percent extra zeal & youth! – Dan G (borrowing parts)

UC Berkeley "The Beauty and Joy of Computing": Future of Computing (9)

## Quantum Computing (1)

- Proposed computing device using quantum mechanics
  - This field in its infancy...
- Normally: bits, which are either 0 or 1
- Quantum: qubits, either 0, 1 or "quantum superposition" of these
  - This is the key idea

If you have 2 bits, they're in exactly one of these:  
00, 01, 10 or 11

If you have 2 qubits, they're in ALL these states with varying probabilities

[en.wikipedia.org/wiki/Quantum\\_computer](http://en.wikipedia.org/wiki/Quantum_computer)

UC Berkeley "The Beauty and Joy of Computing": Future of Computing (10)

## Quantum Computing (2)

- Imagine a problem with these four properties:
  - The only way to solve it is to guess answers repeatedly and check them,
  - There are  $n$  possible answers to check,
  - Every possible answer takes the same amount of time to check, and
  - There are no clues about which answers might be better: generating possibilities randomly is just as good as checking them in some special order.
- ...like trying to crack a password from an encrypted file
- A normal computer
  - would take (in the worst case)  $n$  steps
- A quantum computer
  - can solve the problem in steps proportional to  $\sqrt{n}$
- Why does this matter?

UC Berkeley "The Beauty and Joy of Computing": Future of Computing (11)

## Quantum Computing (3)

- Say the password is exactly 72 bits (0/1)
- That's  $2^{72}$  possibilities
- Let's say our Mac lab attacked the problem
  - 30 machines/lab \* 8 cores/machine \* 3 GHz (say 3 billion checks per second/core)
  - = 720,000,000,000 checks/sec/lab
  - = 720 Gchecks/sec/lab
- Regular computers
  - $2^{72}$  checks needed / 720 Gchecks/sec/lab
  - = 6.6 billion sec/lab
  - = 208 years/lab
- 72-qubit quantum computers in time  $\propto$  to
  - $\sqrt{2^{72}} = 2^{36}$
  - $2^{36}$  checks needed / 720 Gchecks/sec/lab
  - = 0.1 sec/lab

UC Berkeley "The Beauty and Joy of Computing": Future of Computing (12)

Quantum Computing Explained by Physicists

<http://www.youtube.com/watch?v=T2DXrs0OpHUs>

UC Berkeley "The Beauty and Joy of Computing" : Future of Computing (13)

DNA Computing

- Proposed computing device using DNA to do the work
  - Take advantage of the different molecules of DNA to try many possibilities at once
  - Ala parallel computing
  - Also in its infancy
- In 2004, researchers claimed they built one
  - Paper in "Nature"

[en.wikipedia.org/wiki/DNA\\_computing](http://en.wikipedia.org/wiki/DNA_computing)

UC Berkeley "The Beauty and Joy of Computing" : Future of Computing (14)

[www.eecs.berkeley.edu/~maharbiz/Cyborg.html](http://www.eecs.berkeley.edu/~maharbiz/Cyborg.html)

Biological Machines

- Michel Maharbiz and his team at Cal have wired insects (here a giant flower beetle) and can control flight
  - Implanted as Pupa
- Vision
  - Imagine devices that can collect, manipulate, store and act on info from environment

UC Berkeley "The Beauty and Joy of Computing" : Future of Computing (15)

Peer Instruction

What is the most exciting future for computing?

- Incremental improvements in computing architectures
- Quantum computing
- DNA computing
- Biological Machines
- Something completely different

UC Berkeley "The Beauty and Joy of Computing" : Future of Computing (16)

Summary

- What a wonderful time we live in; we're far from done
  - What about privacy?
- Find out the problem you want to solve
  - Computing can and will help us solve it
- We probably can't even imagine future software + hardware breakthroughs

UC Berkeley "The Beauty and Joy of Computing" : Future of Computing (17)

The Future for Future Cal Alumni

- What's The Future?
- New Millennium
  - Always-on internet connectivity + internet of things!
  - AI breakthroughs
  - HCI breakthroughs
  - Post-PC Era (power is in cloud, interface in pocket)

"The best way to predict the future is to invent it"

– Alan Kay

The Future is up to you!

UC Berkeley "The Beauty and Joy of Computing" : Future of Computing (18)
