

Lists & HOFs:

WARM UP:

1. Write the block 'prepend-every' that prepends the first input to each word of the second input sentence, for example:

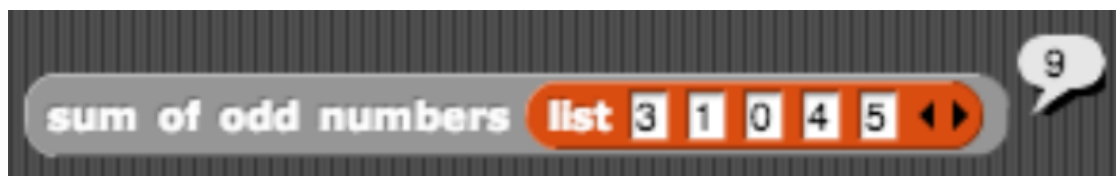

2. Write the block "short-words" that reports only the words with length less than 4. For example:

MEDIUM DIFFICULTY:

3. Write the block 'sum-of-odd-numbers' that reports the sum of only the odd numbers in a list.

CHALLENGE:

4. Find the length of a list using HOF's. You are not allowed to use the 'length of list' default block. See example below:
